Course: Banking & Finance Special Paper I

(Semester III -236 B & Semester IV – 246 B)

After successfully completing this course, student will able to-

CO1: Describe structure of Banking in India.

CO2: Define concept of Central Banking.

CO3: Describe Private sector Banking and types of Private Sector Banks.

CO4: Explain about Public Sector Bank and classification of public Sector Banks.

CO5: Explain the structure of Co-operative Banking in India.

CO6: Discuss the Functions and Roles of Development Banking.

CO7: Illustrate various concepts of Banking.

CO8: Explain role of various Committees on Banking Sector Reforms.

T.Y.B.COM:

Course 301: Business Regulatory Framework (Mercantile Law):

After successfully completing this course, student will able to-

CO1: Explain the meaning of Contract, Offer & Acceptance, Consideration, Consent, Free Consent, and Discharge of Contract.

CO2: Understand the terms Partnership, Limited Liability Partnership, Designated partner, the rights & duties of partners under Partnership Act,1932, know the process and legal requirements for incorporation of LLP, liabilities of LLP & partners, their relations, Financial Disclosure, Conversion, Winding up and Dissolution of LLP.

CO3: Understand the Sale of Goods Act, 1932, define the terms of Sale, Agreement to Sale, rights of an unpaid seller, describe implied conditions and warranties, and explain legal provision regarding transfer by non-owners.

CO4: Know the meaning of E-Contracts, Digital Signature, Describe formation & recognition of E-Contracts, discuss the relevance of Digital Signature and Digital Certificate.

CO5: Explain the terms like Consumer, Complaint, Services, unfair trade practices, restrictive trade practices, discuss consumer protection councils, redressal agencies, describe the procedure to file complaint and resolve the complaint, relief available to customers.

CO6: Elaborate the objectives, organs, programs, and activities of WIPO, define the terms Patent, Copyright, Trademarks, Design, Geographical Indication, Trade secrets and Traditional Knowledge.

CO7: Explain the terms Negotiable Instruments, Promissory Note, bill of exchange, Cheque, discuss the meaning of Holder, Holder in due course, and privileges of Holder in due course, kinds of endorsement.

CO8: Understand Arbitration, essentials of arbitration agreement, describe the rights and duties of arbitrator and explain the meaning of Conciliation.

Course 302: Advanced Accounting

After successfully completing this course, student will able to-

CO1: To know about Impart the knowledge of Indian accounting standards and IFRS like AS- 3, AS-7, AS-12, AS-15 AS-17 to AS-25.

CO2: Banking Company, Legal Provisions, Non - Performing Assets (NPA), Reserve Fund, Acceptance, Endorsements & Other Obligations and Preparation of Final Accounts in vertical form as per Banking Regulation Act 1949. By studying this topic students will come to understand about functioning and working of Banking . It also leads to know about guidelines apply by various banks and financial institutions for its working.

CO3: While studying this topic student will able to Calculate amount of insurance claims using various methods like Claim for Loss of Stock, claim for Loss of Profit and Claim for Loss of Fixed Assets.

CO4: Co-operative society and prepare financial reports as per Maharashtra State Co-operative Societies Act helps students to know about how co-operative works and prepare their financial statements.

CO5: Topic of indirect tax like VAT & VAT Report, Service Tax, Central Value Added Tax and Income Tax - Tax Deducted at Source (TDS) and calculate tax liability using computer improve students' knowledge regarding various kinds of duties and taxes.

CO6: The methods of maintaining accounts of different types of branches and Goods supplied at Cost & Invoice Price helps students to know about pricing methods used by business organization.

CO7: Ascertain profit or loss by using various methods in single entry system like Preparation of Cash Book, Total Debtor Account, Total Creditor Account, and Final Accounts it helps students to study various accounts heads and procedures used while entering transactions in different books.

CO8: Analysis and evaluate the financial performance using various ratios like Gross Profit Ratio, Net Profit Ratio, Operating Ratio, Stock Turnover Ratio, Debtor Turnover Ratio, Current Ratio, Liquid Ratio, Debt to Equity Ratio.

Course 304: Auditing & Taxation

After successfully completing this course, student will able to-

CO1: The students will understand various concepts of audit like Types of errors and frauds, Various Classes of Audit, Audit Programme, Audit Note Book, Working Papers, Internal Control-Internal Check-Internal Audit it helps them to know process followed by Auditors while conducting Audit.

CO2: By studying verification and valuation of assets and liabilities and Auditing and Assurance Standards like AAS- 1,2,3,4,5,28,29 students will aware of policies and guidelines use by Auditor for verification and valuation of different aspect of business organizations.

CO3: The Topic related Recognize Company Auditor like his Qualification, Disqualifications, Appointment, Removal, Rights, Duties and liabilities helps Students to know about procedures follow by business organization related to Appointment of Auditor.

CO4: Tax audit with computerized system and Scope of Auditor's Role under Income Tax Act helps students to know how Audit is conducted in computerized systems .It lead to give students idea about policies follow by Auditor while conducting Audit in computerized system.

After successfully completing this course, student will be able to –

- CO1:** Understand the concept of knowledge management.
- CO2:** Analyse evolution of knowledge management.
- CO3:** Elaborate the drives of organizational learning.
- CO4:** Discuss organizational learning frame work.
- CO5:** Demonstrate knowledge management tools.
- CO6:** Describe cultural change management.
- CO7:** Study organizational culture for organization development.
- CO8:** Understand measuring of organizational, cultural and climatic norms.

M.COM PART II:-

M.COM SEMESTER III:

Course 301: Business Finance

After successfully completing this course, student will able to-

- CO1:** Explain the role and Importance of Corporate finance and Calculating of Value of Money
- CO2:** Discuss theories of Capitalization
- CO3:** Explain the sources of finance for growing Business.
- CO4:** Explain about Short Term Finance and Working Capital.

Course 302: Research Methodology for Business:

After successfully completing this course, student will be able to –

- CO1:** Gain deeper understanding about the various concepts of Research in business.
- CO2:** Know the different types of research and the steps in business research process.
- CO3:** Make the formulation of research problem.
- CO4:** Understand various sampling methods in business research.
- CO5:** Distinguish primary and secondary methods of data collection for research.
- CO6:** Describe various techniques of data analysis and processing in research.
- CO7:** Know the writing skill for research project report in business.
- CO8:** Describe various ways of citation & bibliography for writing of report in business.

Course 313: Human Resource Management (SP-V)

After successfully completing this course, student will able to-

- CO1:** Explain concept of HRM and HR environment in organisation.
- CO2:** Discuss about Recruitment, Selection, and Kind of Retirement.
- CO3:** Explain concept of performance appraisal and merit rating in Human Resource Management.
- CO4:** Understand Recent Trends in HRM after Covid-19.

Course 314: Organizational Behaviour (SP-VI)

After successfully completing this course, student will able to-

- CO1:** Define concepts of Organisational Behaviour.
- CO2:** Identify concept of Horizontal Network and Virtual Design of Organisation.
- CO3:** Classify theories of Motivation and Define concept of Emotional Intelligence in Workplaces.
- CO4:** Differentiate various types concept of Stress Conflict and Groups.

M.COM SEMESTER IV:

Course 401: Capital Market and Financial Services

After successfully completing this course, student will be able to –

- CO1:** Define capital market instruments.
- CO2:** Understand different instruments of financial market.
- CO3:** Understand stock market in detail.
- CO4:** Know the functions of primary and secondary market.
- CO5:** Study different types of mutual funds and merchant banking.
- CO6:** Analyse the concept of portfolio management and credit rating.
- CO7:** Know the role of SEBI in financial market.
- CO8:** Understand new trends in Securities and Exchange Board of India.

Course 402: Industrial Economic Environment

After successfully completing this course, student will able to-

- CO1:** Explain concept of Industrial Finance.
- CO2:** Discuss about new Industrial Policy 1991
- CO3:** Explain effects of New Industrial Policy on Industry.
- CO4:** Discuss Progress and Problems of Steel, Textile and Sugar Industries.

Course 413: Recent Advances in Business Administration (SP-VII)

After successfully completing this course, student will able to-

- CO1:** Explain concept and principals of Change Management.
- CO2:** Discuss about Customer Centric Approach.
- CO3:** Understand Global Management System and Cross Cultural Management issues.
- CO4:** Explain concept of Tern around Management and step of Innovation Management.

402: Project Work (SP-VIII)

After successfully completing this course, student will be able to –

CO1: Understand and implement concepts of Research in business.

CO2: Prepare a research proposal or synopsis for project report.

CO3: Learn formulation of a research problem.

CO4: Develop research objectives and hypothesis.

CO5: Formulate questionnaire for collecting primary data and define sample size by using different sampling methods.

CO6: Understanding the application of secondary data in research.

CO7: Learn to analyse and interpret the data collected.

CO7: Learn verification of objectives, hypothesis testing and drawing conclusions from research work.

CO8: Learn how to write a research report in a systematic and scientific manner.

CO9: Understand and use modes of citation & bibliography.

Lonavala Education Trust's Dr. B.N. Purandare Arts, Smt. S.G. Gupta Commerce and
Smt. Shardaben Amrutlal Mithaiwala Science College, Lonavala-410403.

DEPARTMENT OF CHEMISTRY

Three Year B.Sc. Chemistry undergraduate programmes

B.Sc. Chemistry is three year Degree Programmes i.e. F.Y.B.Sc, S.Y.B.Sc & T.Y.B.Sc Chemistry. The systematic and planned curricula from first year to the third year shall motivate and encourage the students for pursuing higher studies in various disciplines of Chemistry such as Physical, Inorganic, Organic, Analytical, Industrial, Agricultural, Dairy, Environmental and Biochemistry. This curriculum also enable student to shoulder the responsibility as Chemist in chemical industry through a well designed Laboratory or practical course.

Programme Outcomes (POs):-

1. To achieve the basic skills required for understanding the fundamental concepts and authenticating the basic laws and principles of Science domain.
2. To develop scientific, analytical and problem solving skills and attitude.
3. To develop discipline specific interest of students by understanding the nature and role of sciences in practical world.
4. To understand the applications of sciences in medicines, food, agriculture, industry, etc. and in everyday life.
5. To build the background for applicative and advanced studies of natural sciences such as Physics, Chemistry, Biology, Geology, etc
6. To become entrepreneur by starting the small scale business related to water analysis, soil analysis, Sericulture, etc.
7. To apply for discipline specific competitive exams conducted by MPSc, UPSc and other service commissions.

Programme Specific Outcomes (PSOs):-

1. To make students aware and assure that Chemistry is the central science and its role in bridging the gap of all other natural sciences.
2. To make aware students the role of Chemistry in everyday life
3. To develop scientific, analytical and problem solving skills.

4. To pursue Post Graduate programme in various branches of Chemistry such as Organic, Inorganic, Physical, Analytical, Industrial, Medicinal, etc and also other related PG programmes.
5. To offers massive job opportunities at all level of chemical, pharmaceutical, food products and life oriented material industries and also in academics as Laboratory Assistant.
6. To provide specific placements in Chemical Laboratory, Chemical Industries, R & D laboratory & almost all other allied Division as Chemist or Assistant Chemist.
7. To be comfortable with the up-and-coming areas of Chemistry and their applications in various fields of Chemical sciences.
8. To communicate the students importance of Chemistry in future studies such as Research, Industry oriented and even in academics.
9. To improve skills in the proper handling of laboratory glassware's, equipment, apparatus and chemicals.
10. To impart the different processes used in industries and their applications.

Course Outcomes (COs):-

F.Y.B.Sc Chemistry

(To be implemented from Academic Year 2013-2014 to 2018-2019)

C-1: Physical and Inorganic Chemistry (Annual Pattern)

After completing the course students must understand the States of Matter, Surface Chemistry, Chemical Mathematics, Mole Concept, Stoichiometric and Numerical, Oxidation- reduction, Atomic Structure, Chemical Thermodynamics, Chemical Bonding.

C-2: Organic and Inorganic Chemistry (Annual Pattern)

Students will learn Chemical Bonding in Organic Molecules, Chemistry of Hydrocarbons, Chemistry of s-block elements, Chemistry of Functional Groups, Stereochemistry and Chemistry of p-block elements.

C-3: Practical/Lab Course (Annual Pattern)

1. The design of practical course is in relevance to the theory courses which helps to improve the Understanding of the basic concepts.
2. It will be helpful help in development of practical skills of the students.
3. It is to be expected that use of micro scale techniques as per requirements and needs.

F.Y.B.Sc Chemistry
Choice Based Credit System [CBCS] Syllabus
(To be implemented from Academic Year 2019-2020)

CH- 101: Physical Chemistry (Sem-I)

After completing the course work learner will be acquired with knowledge of chemical energetics, Chemical equilibrium and ionic equilibria.

CH- 102: Organic Chemistry (Sem-I)

Will learn Fundamentals of organic chemistry, stereochemistry (Conformations, configurations and nomenclatures) and functional group approach for aliphatic hydrocarbons

CH- 201: Inorganic Chemistry (Sem-II)

Students will learn quantum mechanical approach to atomic structure, Periodicity of elements, various theories for chemical bonding and calculations used in analytical chemistry

CH-202: Organic Chemistry (Sem-II)

Students will learn Functional group approach for the various reactions (preparations & reactions) in context to their structure

CH 103 + 203: Lab Course (Sem-I +II)

1. The practical course is in relevance to the theory courses to improve the Understanding of the concepts.
2. It would help in development of practical skills of the students.
3. Use of micro scale techniques wherever required.

S.Y.B.Sc Chemistry
(To be implemented from Academic Year 2009-2010 to 2013-2014)

CH-211 Physical Chemistry (Sem-I)

Students will learn Thermodynamics, Free Energy and Equilibrium, Colligative Properties of Solutions, Solutions of liquids in liquids and Nernst distribution law.

CH-212 Organic Chemistry (Sem-I)

1. To learn Stereoisomerism: (Three dimensional aspects of sp^3 hybridized carbon)
2. To understand the Chemistry of Aldehyde and ketones
3. To learn Chemistry of Natural and Unnatural carboxylic acids and their derivatives.
4. To study Aliphatic and Aromatic amines
5. To prepare Functional group Inter conversion
6. To study Chemistry of Homocyclic and Heterocyclic compounds
7. To learn Introduction to Biomolecules

CH-221 Inorganic Chemistry (Sem-II)

1. To study principles and process of metallurgy.
2. To study metallurgy of Aluminium.
3. To study metallurgy of Iron.
4. To know the chemistry of p-block elements
5. To know the chemistry of p-block elements
6. To learn the chemical toxicology
7. To study different solvents and the different theories of acids and bases.
8. To know the corrosion and passivity.

CH-222 Analytical Chemistry (Sem-II)

Student should know Introduction to Analytical chemistry, Inorganic Qualitative Analysis, Analysis of organic compounds, Errors in Quantitative Analysis Volumetric Analysis: a. Acid- base b. Oxidation-Reduction c. Complexometric d. Indrometry, Iodimetry e. Argentimetry, Solvent Extraction.

CH-223 Practical/Lab Course (Sem-I+II)

1. To equip students to correlate theoretical and experimental knowledge.

2. To learn Organic qualitative analysis of Binary Mixtures without ether separation.
3. Acquire skill of crystallisation, record correct m. p. / b. p.
4. To learn the Analytical estimations.

S.Y.B.Sc Chemistry

(To be implemented from Academic Year 2014-2015 to 2019-20)

CH-211 Physical & Analytical Chemistry (SEM-I)

1. To introduce concept of kinetics at undergraduate level.
2. To impart basic knowledge of photochemistry and its applications
3. To understand Nernst Distribution Law and its applications
4. To introduce basics of analytical chemistry
5. To understand errors and its interpretation
6. To study the theory underlying Inorganic Qualitative analysis
7. To disseminate knowledge of qualitative & quantitative analysis of organic compounds.

CH-212 Organic & Inorganic Chemistry (SEM-I)

1. Students should be able to understand the Stereoisomerism in terms of following points
2. To know the basic concepts of organic reaction mechanism
3. To study principles and process of metallurgy
4. To study metallurgy of Aluminium.
5. To study metallurgy of Iron.
6. To understand Corrosion and Passivity.

CH-221 Physical & Analytical Chemistry (SEM-II)

1. To conceptualize phenomenon of free energy and equilibria.
2. To distinguish behavior of liquid phase solutions.
3. To provide basic knowledge essential for volumetric analysis.
4. To learn and equip with non instrumental volumetric techniques.

CH-222 Organic & Inorganic Chemistry (SEM-II)

1. Students should understand the concepts of reagents in organic synthesis.
2. To learn the Chemistry of heterocyclic compounds with one hetero atom.
3. To understand the introductory part of Biomolecules such as carbohydrates, proteins, vitamins, hormones, amino acids, etc.
4. To know the chemistry of d-block elements.
5. To study the metal carbonyl complexes and their uses in the homogenous catalysis.

6. To study different solvents and to know the different theories of acids and bases.
7. To know chemical toxicology and toxic chemical in the environment.

CH-223 Practical/Laboratory Course (SEM-I+II)

1. To equip students to correlate theoretical and experimental knowledge.
2. To learn Organic qualitative analysis of Binary Mixtures without ether separation.
3. To learn the Analytical estimations.
To verify theoretical principles experimentally.

S.Y.B.Sc Chemistry

(To be implemented from Academic Year 2020-21_CBSC Pattern)

Course Outcome:

1. To understand basic concept/principles of Physical, Analytical, Organic and Inorganic chemistry.
2. To impart practical skills and learn basics behind experiments.
3. To prepare background for advanced and applied studies in chemistry.

T.Y.B.Sc Chemistry

(To be implemented from Academic Year 2015-2016)

CH-331: Physical Chemistry (SEM-I)

After studying this course, student is expected

1. To know Chemical Kinetics
2. To learn Electrolytic Conductance
3. To know Investigation of Molecular Structure
4. To know Phase Rule

CH-332: Inorganic Chemistry (SEM-I)

1. Student should know Molecular Orbital Theory
2. Know the theories of covalent bond formation
3. Know the assumptions and limitations of VBT
4. Understand the need of concept of MOT
5. Know LCAO principal and its approximation
6. Understand and show the formation of bonding and antibonding MO's
7. Draw the MO energy level diagrams for homonuclear diatomic molecules
8. Draw the shapes of molecular orbitals.
9. Give the calculations of bond order, energy and explanation on stability of the above molecule
10. Introductory Part to Coordination Chemistry
11. Isomerism In Coordination Complexes
12. Sidgwick Theory
13. Pauling's Valence Bond Theory
14. Crystal Field Theory
15. Molecular Orbital Theory Of Coordination Complex

CH-333: Organic Chemistry (SEM-I)

After completing this syllabus student should know

1. Definition and types of aromatic substitution reactions
2. Classification of directing groups
3. What is an arenium ion and Ipso substitution?
4. The evidences, reactivity and mechanism of these reactions
5. Whether a given reaction follows addition-Elimination or Elimination-addition mechanism?
6. To predict product/s or supply the reagent/s for these reactions

CH-334: Analytical Chemistry (SEM-I)

Student learn

1. Gravimetric Analysis
2. Thermal methods of analysis
3. Spectrophotometry
4. Polarography
5. Atomic Absorption Spectroscopy
6. Flame Emission Spectroscopy

CH-335: Industrial Chemistry (SEM-I)

1. Modern Approach to Chemical Industry 08
2. Agrochemicals 08
3. Manufacture of Basic Chemicals 08
4. Petrochemicals and eco-friendly fuels 08
5. Food and Starch Industry 08
6. Cement and Glass industry

CH-336-E Agriculture Chemistry (SEM-I)

After studying this course, student is expected to

1. Know the role of agriculture chemistry and its potential
2. Understand basic concept of soil, properties of soil & its classification on the basis of pH
3. Know the different plant nutrients, their functions and deficiency symptoms
4. Understand importance of manures as compared to chemical fertilizers'
5. Understand the importance of green manuring
6. Have the knowledge of the use of proper the plants
7. Know various techniques to protect the plants
8. Have the knowledge of various pesticides, insecticides, fungicides and herbicides
9. Identify the problematic soil and recommend method for their reclamation
10. Have the knowledge of quality irrigation water, water quality standard and analysis of

Irrigation water

CH-341: Physical Chemistry (Sem-II)

Students are expected to understand

1. Electrochemical Cells
2. Nuclear Chemistry
3. Crystal Structure
4. Quantum Chemistry

CH-342: Inorganic Chemistry (Sem-II)

A student should know:

The meaning of term f-block elements, Inner transition elements, lanthanides, actinides. The meaning of metal & semiconductor, The difference between metal, semiconductor and insulator. Know the nature of solids, know the crystal structures of solids. Homogeneous and Heterogeneous Catalysis Bioinorganic Chemistry

CH-343: Organic Chemistry (Sem-II)

Students should learn–

1. What are terpenoids and alkaloids?
2. Various methods of isolation/extraction of these natural products.
3. Synthesis of Citral and Ephedrin by Barbier- Bouveault and Nagi methods, respectively.
4. To determine the structure of above compounds by chemical methods.

CH-344: Analytical Chemistry (Sem-II)

1. Solvent Extraction
2. Chromatography
3. Gas Chromatography
4. High Performance Liquid Chromatography
5. Electrophoresis
6. Nephelometry and Turbidimetry

CH-345: Industrial Chemistry (Sem-II)

1. Polymer chemistry
2. Sugar and Fermentation Industry
3. Soap, detergents and Cosmetics
4. Dyes and paints
5. Chemistry of pharmaceutical industries
6. Pollution prevention and waste management

CH-346-E Dairy Chemistry (Sem-II)

The students are expected to study “Dairy Chemistry” in view of-

1. Knowing importance of the subject from the point of rural economy.
2. Knowing the composition of milk, its food & nutritive value
3. Understanding the Microbiology of the milk
4. Understanding various preservation and adulterants, various milk proteins and their role for the human body.
5. Knowing various milk products, their composition, manufacture and uses.

CH-347: Physical Chemistry Practicals

Students will perform the experiments on Chemical Kinetics, Viscosity, Adsorption, Phenol-water system, Transport number, Refractometry, Colorometry, Potentiometry, Conductometry, pH meter, Radioactivity.

CH-348: Inorganic Chemistry Practicals

It is expected that students should understand and learn Qualitative Analysis, Separation of binary mixture by Column chromatography, volumetric estimations, Calorimetric estimations, Gravimetric Estimations, Inorganic Preparations, etc

CH-349: Organic Chemistry Practicals

Separation of Binary Mixtures and Qualitative Analysis, Organic Preparations, Preparation of Derivatives,

T.Y.B.Sc Chemistry

(To be implemented from Academic Year 2009-2010 To 2014-15)

CH-331: Physical Chemistry (Sem-I)

Students must learn the Kinetics of Homogeneous Reactions, Adsorption, Crystal Structure, Investigations of molecular structure.

CH-332: Inorganic Chemistry (Sem-I)

The student should:

1. Know the various types of Ligands
2. Know the meaning of the terms used in co-ordination chemistry
3. Be able to name the co-ordination compound when the structure is given to them.
4. Know the application of co- ordination compounds in biology and chemistry.
5. Be able to draw the geometrical and optical isomerism of complexes.
6. Be able to explain various types of isomerism.
7. Know the merits and the demerits of Sidwick's theory
8. Know the assumptions of VBT and explain the VBT / and explain the VBT of different
9. complexes.
10. Know the limitations of VBT.
11. Know outer and inner orbital complexes, electro neutrality principle, multiple bonding
12. Be able to draw crystal field splitting of d orbital of metal ion in octahedral, tetrahedral
13. square planer of tetragonal ligand field.
14. Know the assumptions of CFT.
15. Be able to explain the terms Strong field and weak field splitting.
16. Be able to explain magnetic property CFT spectra.
17. Be able to give evidences of CFSE.
18. Be able to explain Charge transfer Spectra.
19. Be able to explain John- Teller distortion of octahedral complex and its effect on
20. Spectra.
21. Be able to compare the different approaches to bonding in Co-ordination compounds.

CH-333: Organic Chemistry (Sem-I)

The student should know Organic Structures, nomenclatures, Properties and Reactivities, Stereochemistry of disubstituted cyclohexane, Nucleophilic substitution at aliphatic Carbon, Reactions of Carbon –Carbon double bond & triple bond, Reactions of Carbon –Oxygen double bond, Oxidation & Reduction reactions, Elimination Reaction.

CH-334: Analytical Chemistry (Sem-I)

Student must able to learn

1. Gravimetric Analysis
2. Electrogravimetry
3. Spectrophotometry
4. Atomic Absorption Spectroscopy
5. 5 Flame Emission Spectroscopy
6. Nephelometry and Turbidometry

CH-335: Industrial Chemistry (Sem-I)

Student should focus on

1 General Aspects of Chemical Industry

The students are expected to learn; Importance of chemical industry, meaning of the

terms involved, comparison between batch and continuous process, knowledge of various industrial acts.

2 Manufacture of basic chemicals

The students are expected to learn physico-chemical principles involved in the manufacturing process, manufacture of basic chemicals with the help of flow sheet diagram, they should know the applications of these chemicals.

3 Fertilizer Industry

The students are expected to learn importance of synthetic and natural fertilizers and NPK ratios, the various manufacturing processes with flow sheet diagram,

4 Sugar Industry

The students are expected to learn importance of sugar industry, manufacture of direct

consumption (plantation white) sugar with flow diagram. Cane juice extraction by various methods, clarification by processes like carbonation, sulphitation, phosphotation

etc. Concentration of juice by using multiple effect evaporator system, Crystallization

of sucrose by using vacuum pan.

5 Fermentation Industry

The students are expected to learn importance of fermentation industry

Various methods of manufactures, manufacture of wine from grapes,

6 Pollution prevention and waste management

The students are expected to learn all the problems of pollution and disposal of waste of various industries.

CH-336-E Agriculture Chemistry (Sem-I)

After studying this course, student is expected to

1. Know the role of agriculture chemistry and its potential
2. Understand basic concept of soil, properties of soil & its classification on the basis of pH
3. Know the different plant nutrients, Their functions and deficiency symptoms
4. Understand importance of manures as compared to chemical fertilizers'
5. Understand the importance of green manuring
6. Have the knowledge of the use of proper the plants
7. Know various techniques to protect the plants
8. Have the knowledge of various pesticides, insecticides, fungicides and herbicides
9. Identify the problematic soil and recommend method for their reclamation
10. Have the knowledge of quality irrigation water, water quality standard and analysis of irrigation water

CH-341: Physical Chemistry (Sem-II)

Electrolytic conductance, Electrochemical cells, Nuclear Chemistry, Elements of Quantum Chemistry.

CH-342: Inorganic Chemistry (Sem-II)

Student should know

1. Chemistry of f-block element
2. Bioinorganic Chemistry
3. Organometallic Chemistry
4. Metals Semiconductors and Superconductors
5. Ionic Solids
6. Thermodynamic properties of Co-ordination Complexes

CH-343: Organic Chemistry (Sem-II)

Aromatic Electrophilic and Nucleophilic Reactions, Carbanions and their reactions, Retrosynthetic analysis and applications, Spectroscopic methods in structure determination of Organic compounds, Natural Products

CH-344: Analytical Chemistry (Sem-II)

Students can understand

1. Paleography
2. pH-Metry
3. Chromatographic Analysis
4. Electrophoresis
5. Gas Chromatography
6. High Performance Liquid Chromatography
7. Mass Spectrometry

CH-345: Industrial Chemistry (Sem-II)

Student should learn

1 Cement and ceramic industries:

The students are expected to learn importance of these industries, manufacture of cement by modern methods, various ceramic products, different procedure involved and technical ceramics

2 Glass industry

The students are expected to learn about making of glass by different methods, various operations involved in the manufacture and compositions, properties and uses of special glasses.

3 Dyes

The students are expected to learn about the various theories of color and chemical constitution, difference between dyes and pigments,

Uses of pigments.

4 Soaps and detergents :

The students are expected to learn various soap products, their manufacture, special soap products, importance of detergents, meaning of the terms involved in washing action of the soap and detergents.

5 Pharmaceutical Industry

The students are expected to learn importance of this industry, meanings of the terms involved in diagnosis, prevention and curing of the diseases

6 Fuels

The students are expected to learn importance of fuels, types of fuels, properties of fuels, preparation of bio-diesel

CH-346-E Dairy Chemistry (Sem-II)

The students are expected to study "Dairy Chemistry" in view of-

1. Knowing importance of the subject from the point of rural economy.
2. Knowing the composition of milk, its food & nutritive value
3. Understanding the Microbiology of the milk
4. Understanding various preservation and adulterants, various milk proteins and their role for the human body.
5. Knowing various milk products, their composition, manufacture and uses.

CH-347: Physical Chemistry Practicals

Students will perform the experiments on Chemical Kinetics, Viscosity, Adsorption, Phenol-water system, Transport number, Refractometry, Colorometry, Potentiometry, Conductometry, pH metery, Radioactivity.

CH-348: Inorganic Chemistry Practicals

It is expected that students should understand and learn Qualitative Analysis, Separation of binary mixture by Column chromatography, volumetric estimations, Calorimetric estimations, Gravimetric Estimations, Inorganic Preparations, etc

CH-349: Organic Chemistry Practicals

Separation of Binary Mixtures and Qualitative Analysis, Organic Preparations, Preparation of Derivatives,

Course Outcomes (CO's)

CO1: F.Y.B.Sc.

Mechanics and Properties of Matter:

- Revision of Newton's Laws of motion and demonstrate it with day today examples.
- Basics of work-Energy, Surface Tension, Elasticity, Viscosity and fluid mechanics by solving related problems.

Physics Principles and its Applications:

- To understand the basics and development in the understanding of atomic structure.
- To understand the basic principle of LASER, its LASER action and various Applications.
- To understand the types of bonds and their roles in the formation of molecules.
- To understand the historical perspective, general properties and applications of Electromagnetic waves.

Heat and Thermodynamics:

- To define the fundamentals of Thermodynamics and laws of Thermodynamics.
- To understand the heat transfer mechanism such as Carnot's cycle, Carnot's heat engine, different heat engines such as Otto engine and diesel engine.
- To understand the construction and working of different types of thermometers used in laboratory and industries.

Electricity and Magnetism:

- To understand the fundamentals of Electrostatics and Magnetostatics by learning the different related laws in Physics which describes the electric and magnetic fields in detail.
- To understand the concept and application of dielectrics.
- To understand the different properties of magnetic materials.

CO2: S.Y.B.Sc.

Mathematical Methods in Physics

- To introduce the complex numbers with its different forms (rectangular, polar and exponential form) and study applications of complex numbers.
- To study the different forms of differentiation such as partial, total, exact etc. by solving related problems.
- To revise the scalar and vector product and to study its triple product with problems.

Electronics

- To apply different network theorems related to electrical circuits.
- To understand basics and working of transistors.
- To understand the working principle and working of operational amplifiers.
- To study different number system and detail working of logic gates.

Oscillation, Waves and Sound

- To understand the difference in undamped, damped and forced oscillations with their numerical expressions and examples.
- To study the basics of wave motion, their types and related concepts in detail.
- To study the different characteristics and its related concepts of sound such as Doppler effect and its applications.

Optics

- To describe the fundamental concepts of lenses and their different aberrations.
- To understand the concept of focal length and cardinal points with problems.
- To understand the basic operation of many optical devices.
- To study in detail about interference, diffraction and polarization.

CO3: T.Y.B.Sc.

Mathematical methods in Physics

- To understand cartesian, spherical polar and cylindrical co-ordinate systems, transformation equations, and general curvilinear co-ordinate system.
- To demonstrate the special theory of relativity with examples.
- To understand the differential equation and special functions in detail.

Solid state physics

- To understand the concepts related to crystalline state such as Lattice, Basis, Translational vectors, Primitive unit cell, Symmetry operations, Different types of lattices 2D and 3D (Bravais lattices), Miller indices, Inter planer distances and its different types (SC,FCC and BCC) with their characteristics.
- To introduce X-ray diffraction and other characterization techniques, free electron and band theory in metals and magnetism concepts in detail.

Classical Mechanics:

- To explain the mechanics of system of particles and their motion in a central force field.
- To study the scattering of a particles in centre of mass frame and laboratory frame.
- To introduce the Langrangian and Hamiltonian formulation for N particle system.
- To solve the problems related to canonical transformation and Poisson's bracket.

Atomic and Molecular Physics

- To make understand the history of development in understanding the basic particles of atomic structure and study its energy levels and spectra.
- To demonstrate the one and two electron systems.
- To study the observed Zeeman effect in atoms and molecules.
- To understand the theory and experimental of X-ray, Raman and Molecular spectroscopies.

Computational Physics

- To study the concepts in programming like flowchart and algorithm.
- To understand the basic structure of C-programming, its keywords, registers, character set etc.
- To study the graphics in C with examples.
- To study the various possible errors in this language.

Elements of Material Science

- To study the different types of defects in metals.
- To understand the single and molecular phases in metals.
- To study about Ceramic materials and phase diagrams.
- To introduce about smart material's, their properties, and applications.

Classical Electrodynamics

- To revise the basic laws and detailed theory of electrostatics and magnetostatics.
- To study the electrodynamics and its numerical.

Quantum Mechanics

- To understand the origin of quantum mechanics.
- To introduce the new concepts in modern physics such as Schrodinger equations and its applications.
- To solve the problems related to operators in quantum mechanics.

Thermodynamics and Statistical physics

- To revise the kinetic theory of gases and related concepts such as mean free path, viscosity etc.
- To demonstrate the Maxwells relations and applications.
- To understand the elementary concepts of statistics, distribution of system of particles, statistical ensembles, and quantum statistics.

Nuclear Physics

- To revise the fundamental properties of nucleus.
- To introduce the concept of radioactivity and related phenomenon.
- To understand about the nuclear forces, nuclear reactions, and nuclear energy in detail.
- To understand the theory of particle accelerators and detectors.

Electronics

- To study the various types of diodes, transistor amplifiers, Field effect transistors, and operational amplifiers.
- To understand about timers, different components of regulated power supply.
- To demonstrate about sequential logic circuits.

Lasers

- To introduce the theory and function of LASER and its action.
- To understand about Laser oscillator and its output in detail.
- To study about characteristics, types and applications of lasers.

Department of Mathematics
Programme Specific Outcomes and Course outcomes

Programme Specific Outcomes (PSO):

The completion of the B.Sc. Programme will help students to:

- i) Communicate mathematics strongly by written, computational and graphic means.
- ii) Create mathematical ideas from basic axioms.
- iii) Use mathematics to solve problems by analysing and understanding
- iv) Identify applications of mathematics to the real-world problems

Course Outcomes (CO)

1. Algebra (MT-111)

This course will help students to

- Identify injective, surjective and bijective functions.
- Find inverse of function.
- Apply Euclid's algorithm to find GCD of integers.
- Apply Fermat's theorem to compute remainders
- Apply De-Moivre's theorem to find nth roots of a complex number.

2. Calculus I (MT-112)

This course will help students to

- Determine real numbers satisfying inequations.
- Apply density theorem to find rational number between two irrationals.
- Determine convergence and divergence of sequences.
- Study $\varepsilon - \delta$ definition of limit of a function.
- Study continuity of function on an interval.
- Locate intervals in which root of equation occur.

3. Mathematics Practical (SEM I) (MT-113)

This course will help students to

- Develop computational skills
- Use MAXIMA software to solve mathematical problems
- Use Maxima software to visualize and confirm mathematical concepts graphically.

4. Analytical Geometry (MT-121)

This course will help students to

- Study translation and rotation of axes
- Identify, classify conics and reducing general second degree term to standard form.
- Find equation of plane in normal form
- Find angle between planes, distance between parallel planes.
- Find equation of line in symmetric form.
- Find angle between line and plane, condition of Coplanarity of lines.
- Find equation of spheres in different forms.
- Find plane section of sphere.
- Find equation of tangent plane to the sphere.

5. Calculus II (MT-122)

This course will help students to

- Study mean value theorems
- Find limit using the L'Hospital Rule.
- Find nth derivatives using Leibnitz theorem
- Find Taylor's and Maclaurin's series
- Solve linear ordinary differential equations
- Solve exact differential equations
- Solve non exact differential equations using integrating factors

6. Mathematics Practical (SEM II) (MT-123)

This course will help students to

- Develop computational skills
- Use MAXIMA software to solve mathematical problems
- Use Maxima software to visualize and confirm mathematical concepts graphically.

7. Multivariable Calculus I (MT 231)

This course will help students to

- Sketch level curves and graph of a function
- Discuss limit continuity of functions of several variables.
- Find approximate values using differentials.
- Find extreme values of functions of several variables.
- Study Taylor's theorem for the function of two variables.
- Find double and triple integrations.
- To change the order of double integrals.

8. Numerical Methods (MT 232 A)

This course will help students to

- Find significant figure, errors.
- Round of given numbers to significant figures

Find numerical solutions of algebraic and transcendental equations.
Find derivatives from the tabular data.
Find solutions of ordinary differential equations using Taylor's series,
Euler's method, Runge-Kutta method.

9. Mathematics Practical based on MT 231 AND MT 232 A

This course will help students to

- Develop computational skills
- Use MAXIMA software to solve mathematical problems
- Use Maxima software to visualize and confirm mathematical concepts graphically.

10. Linear Algebra (MT 241)

This course will help students to

Find rank of matrix from its row echelon form
Solve a system of m linear equations in n unknowns.
Study Vector spaces, subspaces, basis, dimension, linear dependence,
independence of vectors and functions.
Study linear transformation, kernel and range of linear transformations.
Study rank-nullity theorem of linear transformation.
Find matrix of linear transformation
Study inner product spaces, Cauchy-Schwarz inequality.
Find an orthogonal basis using the Gram-Schmidt process.

11. Vector Calculus (MT 242 A)

This course will help students to

- Compute limit, derivatives integrals of a vector valued function.
- Compute work done using line integrals
- Apply Green's theorem in the plane to compute line integrals using double integrals.
- Compute surface integrals
- Compute parametrization of surfaces.

12. Mathematics Practical based on MT 241 AND MT 242 A

This course will help students to

- Develop computational skills
- Use MAXIMA software to solve mathematical problems
- Use Maxima software to visualize and confirm mathematical concepts graphically.

Department of Zoology

Course Outcomes:-

B. Sc. (Zoology) First Year B.Sc. Choice Based Credit System Syllabus to be implemented from - Academic Year 2019-2020

Course Code ZY 111 -Animal Diversity-I SEM- I Credits = 2

And

Course Code ZY 121 -Animal Diversity-I SEM II Credits = 2

After successfully completing this course, students will be able

CO1: The student will be able to understand classify and identify the diversity of animals

CO2: The student understands the importance of classification of animals and classifies them effectively using the six levels of classification.

CO3: The student knows his role in nature as a protector, preserver and promoter of life which he has achieved by learning, observing and understanding life.

CO4: Demonstrate anatomical and physiological attributes of each animal group and why these have led to their success

CO5: List the various animals in a given phylum

Course Title: Animal Ecology - Course Code: ZO 112, Semester I (2 Credits)

Learning outcomes for the course: -

CO1: The learners will be able to identify and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics and its impact on ecosystem and biosphere due to the dynamics in population.

CO2: To understand anticipate, analyse and evaluate natural resource issues and act on a lifestyle that conserves nature.

CO3: The Learner understands and appreciates the diversity of ecosystems and applies beyond the syllabi to understand the local lifestyle and problems of the community.

CO4: The learner will be able to link the intricacies of food chains, food webs and link it with human life for its betterment and for non-exploitation of the biotic and abiotic components.

CO5: The working in nature to save environment will help development of leadership skills to promote betterment of environment.

Course Title: Cell biology Course Code: ZO122; Semester II (2 credits)

Learning outcomes for Cell Biology:-

CO1: The learner will understand the importance of cell as a structural and functional unit of life.

CO2: The learner understands and compares between the prokaryotic and eukaryotic system and extrapolates the life to the aspect of development.

CO3: The dynamism of bio membranes indicates the dynamism of life. Its working mechanism and precision are responsible for our performance in life.

CO4: The cellular mechanisms and its functioning depends on endo-membranes and structures. They are best studied with microscopy

**Course Title: Zoology Practical Paper Course Code: ZO113:
Semester I (2 credits)**

And

**Course Title: Zoology Practical Paper Course Code: ZO123:
Semester II (2 credits)**

After successfully completing this course, students will be able to:-

CO1: Identify of the Dissolved oxygen from given water sample.

CO2: Identify of the Water Alkalinity from given water sample.

CO3: Identify of animal community structure by quadrat method (Field or Simulation).

CO4: Detect of density, frequency and abundance of species by quadrat method.

CO5: Prepare of microscopic fauna of freshwater ecosystem (from pond).

CO6: Detect of water holding capacity of given soil sample.

CO7: Detect of dissolved and free carbon dioxide from water sample.

CO8 Identify of Eutrophication in lake/river.

CO9: Explain Study of phylum Protozoa: Euglena, Paramecium, Amoeba, Plasmodium sp.

CO10: Identify Museum study of Phylum Porifera: *Sycon*, *Euplectella*, *Chalina*, *Spongilla*, *Hydra*, *Physalia*, *Aurelia*, *Metridium*.

CO11: Identify Platyhelminthes: *Planeria*, *Faciolahepatica*, *Taenia solium*

CO12: Identify Paramecium: Culture, External morphology, Conjugation and Binary fission.

CO13: Identify permanent slides: Spicules and Gemmules in Sponges, T.S. of *Sycon*, T.S. of *Hydra*, *Taeniasolium*: Scolex, Gravid proglottid.

CO14: Study Visit to Zoological survey of India/ Museum/National Park. Visit to a vermicomposting unit/ field for insect pest collection and its identification.

CO15 Economic importance of honey bees, Lac insects silk worms, red cotton bug, *Anopheles* mosquito CO16 Earthworm: vermicomposting bin preparation and maintenance.

CO17 Identify Microscope: Simple and Compound, Micrometry: Measurement of microscopic objects CO18 Explain of cell: Preparation of temporary mount of human buccal epithelial cells.

CO19 Identify Preparation of blood smears to observe the blood cells & mitotic cell from onion roots

CO20 Observation of Cell organelles (any three) by using microphotographs

S.Y.B.Sc. Zoology (w.e.f. June 2020) As per Choice Based Credit System

Animal Diversity III & IV

Objectives –

1. To understand the origin and advancement of higher vertebrates (tetrapoda).
2. To understand general characters of different groups of higher vertebrates.
3. To classify vertebrates and to become able to understand the possible group of vertebrates observed in nature.
4. To understand different behaviours and adaptations in higher vertebrates
5. To understand affinities among different groups of higher vertebrates.

Learning Outcomes for the course –

1. The students will be able to understand, classify and identify the diversity of higher vertebrates.
2. The students will be able to understand the complexity of higher vertebrates
3. The students will be able to understand different life functions of higher vertebrates.
4. The students will be able to understand the linkage among different groups of higher vertebrates.
5. The student will become aware regarding his role and responsibility towards nature as a protector, to understand his role as a trustee and conservator of life which he has achieved by learning, observing and understanding life.

Applied Zoology I and II Objectives:

1. To understand the basic life cycle of the honeybees, beekeeping tools and equipment.
2. To learn for managing beehives for honey production and pollination.
3. To understand the basic information about fishery, cultural and harvesting methods of fishes.
4. To understand fish preservation techniques.
5. To understand the biology, varieties of silkworms and the basic techniques of silk production and harvesting of cocoons.
6. To learn the different silkworm species and their host plants.
7. To study types of agricultural pests and Major insect pests of agricultural importance.
8. To study Pest control practices.

Learning Outcomes of the course:

1. The learner understands the basics about beekeeping tools, equipment, and managing beehives.
2. The learner understands the basic information about fishery, cultural and harvesting methods of fishes and fish preservation techniques.
3. The learner understands the biology, varieties of silkworms and the basic techniques of silk production.

4. The learner understands the types of agricultural pests, Major insect pests of agricultural importance and Pest control practices.

Third Year B. Sc. Zoology:-

Theory courses: (Sem III: ZY-331 to ZY-336) : Semester

(Sem IV: ZY- 341 to ZY-346) : Semester

Practical Course:(ZY-347-349) : Annual

Department of Zoology- After successful completion student should be able to:

Course ZY 331: Animal Systematics & Diversity V

After successfully completing this course, students will be able to:

CO1: Outline the systematic position of *Pila globosa*. and *Calotes versicolor*

CO2: Understand the evolution, history of phylum.

CO3: Label the organs and systems of *Pila globosa*. and *Calotes versicolor*

CO4: To study the external as well as internal characters of non chordates.

CO5: Describe the major features in the Phylum Protozoa, Porifera, Coelenterata and Hemichordata and the reason of their success in the ecosystem.

CO6: Illustrate the morphological peculiarities of Integument, Heart, Kidney and Brain of vertebrates.

CO7: Understand the economical importance of Molluscs

CO8: Categorize the Accessory respiratory organs in fish.

CO9: Understand the economical importance of Molluscan shells.

CO10: Classify the dentition in mammals.

CO11: Justify the need of electric organs in fish.

CO12: Understand the various internal systems like Digestive system, nervous system with the help of charts.

Course ZY 341: Biological techniques

After successfully completing this course, students will be able to:

CO1: Define the basic terms solution preparation.

CO2: Understand the various Applications of Biotechnology.

CO3: Study and Understand the Hybridoma technology as well as Enzyme biotechnology.

CO3: Describe the techniques used in hematology.

CO4: Study and understand the DNA Recombinant technology.

CO5: Explain the principle of separation techniques.

CO6: Explain the procedure of preparing permanent histological slides.

CO7: Illustrate the working of microscopes.

CO8: Analyze the dimensions of the biological samples.

CO9: Justify the selection of fixatives for histological procedures.

CO10: Understand the industrial and environmental biotechnology.

Course ZY 332: Mammalian Histology

After successfully completing this course, students will be able to:

CO1: Understand the terms Histology and Physiology

- CO2: Study the derivatives of skin- horns, nails, hairs.
- CO3: Study and understand the terms- acidosis, alkalosis, asphexia, hypoxia, anoxia and cyanosis.
- CO4: Explain the location, structure and functions of various organs.
- CO5: Illustrate the histology of endocrine glands.
- CO6: Diagrammatically represent the various organs.

Course ZY- 342: Mammalian Physiology & Endocrinology

After successfully completing this course, students will be able to

- CO1: Understand the Importance of physiology and branches of it.
- CO2: List the various types of digestive enzymes.
- CO3: Understand the terms-Osmosis, diffusion, pH and Buffer.
- CO4: Explain the physiological processes in mammals.
- CO5: Explain the anatomy of various systems.
- CO6: Understand the Digestion and Excretion process, by studying the Organs of it.
- CO7: Understand the Circulatory system and Lymphatic system.
- CO8: Illustrate the reproductive cycles with hormonal control.
- CO9: Diagrammatically represent the working of kidney.
- CO10: Understand the process of Metabolism.
- CO11: Understand the term Detoxification.

Course ZY 333 Biological Chemistry

After successfully completing this course, students will be able to:

- CO1: Understand about the agencies responsible for Production of various products using biochemistry
- CO2: Explain the structure, functions and reactions of the various biomolecules.
- CO3: Understand the structure and function of carbohydrate, amino acids, proteins, and lipids.
- CO4: Give examples of each group type of biomolecules.
- CO5: Correlate the changes in the levels of these biomolecules with the diseases in human
- CO6: Understand the term pH, Buffer.
- CO7: Draw the structures of major biomolecules.
- CO8: Understand the concept Enzymes and also Vitamins and minerals.
- CO9: Understand the Principle role of Vitamins in metabolism and Deficiency diseases

Course ZY 343 Genetics & Molecular biology

After successfully completing this course, students will be able to:

- CO1: Define the basic terms in genetics.
- CO2: Discuss the linkage groups and gene frequency.
- CO3: Explain the concept of mutation.
- CO4: Explain DNA structure.
- CO5: Paraphrase the Central dogma of molecular biology.
- CO6: Illustrate the mechanism of replication, transcription and translation.
- CO7: Justify the post transcriptional and post translational modifications.

Course ZY- 334 Environmental Biology & Toxicology

After successfully completing this course, students will be able to:

- CO1: Know the biotic and abiotic components of ecosystem.
- CO2: List the environmental challenges and their remedies.
- CO3: Describe the nature of ecosystem, productivity, food webs, energy flow,
- CO4: Explain Biosphere, biomes and impact of climate on biomes.
- CO5: Understand diversity among various groups of animal kingdom
- CO6: Explain wildlife management in India and conservation of wildlife.
- CO7: Explain the three necessary and sufficient conditions i.e. struggle for existence; variation; and inheritance.
- CO8: Discuss natural resources, causes of their depletion and their conservation.
- CO9: Illustrate the toxic effects of chemicals in the environment on human and his livestock.
- CO10: Scope , importance and management of biodiversity

Course ZY 344: Organic Evolution:

After successfully completing this course, students will be able to:

- CO 1: Define organic evolution.
- CO 2: Understand theories of organic evolution, isolation, speciation
- CO 3: Describe the concept of origin of life and theories of origin of life.
- CO 4: To understand Origin of life with respect to prokaryotic and eukaryotic cells.
- CO 5: Illustrate the presence of organisms at various geological time scale.
- CO 6: Apply the knowledge in relevant experimentations.
- CO 7: 4. Understand geological time scale, methods and classification of animal distribution and factors affecting animal distribution.
- CO 8: Compare animal distribution in different zoogeographical realms.
- CO-9. Understand the evidences of organic evolution by anatomical embryological list, paleontological, physiological, genetics and molecular biology evidences.

Course ZY 335 Parasitology

After successfully completing this course, students will be able to:

- CO 1: Define the basic terms in parasitology.
- CO2: To study and understand the scope and branches of Medical Zoology.
- CO3: To aware the students for various parasites and diseases which spreads in human with the help of study of host-parasite relationship.
- CO4: Discuss the life cycle and importance of major parasites.
- CO5: Illustrate transmission routes of animal and zoonotic parasites
- CO6: To aware about the typhoid, cholera likes disease.
- CO7: Justify the control measures of arthropod vectors.
- CO8: Convince the importance of hygiene with respect to epidemic diseases.
- CO9: Understand the various disease causing vectors like Mosquitoes
- CO10: To increase awareness for the health in students.
- CO11: Understand the importance of medical diagnostic and also understand the term forensic Entomology

Course ZY 345 General Embryology

After successfully completing this course, students will be able to:

- CO1: Understand the terms: Gametogenesis, Fertilization and early development.
- CO2: Describe the key events in early and systematic embryological development.
- CO3: Understand the Morphogenesis and Organogenesis in animals
- CO4: Describe the chick development up to 96 hours of incubation and extra embryonic membranes.
- CO5: Explain the life cycles of few parasites.
- CO6: Explain the theories of preformation, and concepts like growth, differentiation and reproduction.
- CO7: Explain the principles and process of fertilization and cleavage.
- CO8: Prepare the flow chart of gametogenesis process.
- CO9: Understand the Aging, Apoptosis and Senescence.

Course ZY 336 Cell Biology

After successfully completing this course, students will be able to:

- CO1: Understand the Scope of cell biology, because cell is the basic unit of life.
- CO2: Describe the composition, structure and functions of the plasma membrane.
- CO3: Understand the Main distinguishing characters between plant cell and animal cell.
- CO4: Explain the structure and functions of the nucleus and its components.
- CO5: Describe the three primary components of the cell's cytoskeleton and how they affect cell shape, function, and movement.
- CO6: Diagrammatically represent the phases of division of somatic and gametic cells.
- CO7 :Understand the various applications of cells by using cell biology like study of various types of tumour.
- CO8: Differentiate between rough and smooth endoplasmic reticulum both in structure and function.
- CO-9. To study and understand the whole cell organelles with their structure and function.
- CO10: Understand the cell cycle and know the importance of various cells in body of organisms.
- CO11: Understand the Animal cells and various cell organelles by using microphotographs.

Course ZY 346 Medical Entomology

After successfully completing this course, students will be able to:

- CO1: Understand the fundamentals of agricultural, forest, medical and veterinary entomology
- CO2: Define medical entomology.
- CO3: Explain the social organization of insects with examples.
- CO4: Illustrate the role of household insects in relation to human health.
- CO5: Classify major medically important insects.
- CO6: Understand intra specific and inter specific relationships among insects.
- CO7: Choose the control measures of medically important insects
- CO8: To understand significance of beneficial and harmful insects with

reference to their habit and habitat, life cycle, diseases caused by them and their control measures.

Course ZY 347 Practical Paper I

After successfully completing this course, students will be able to:

- CO1: Identify the organs by studying the histological slides.
- CO2: Identify hormonal disorders using pictures.
- CO3: Use techniques like chromatography, spectrophotometry in biological experiments.
- CO4: Explain the anatomical features of brain, heart, kidney and skin of vertebrates.
- CO5: Demonstrate the importance of modifications in animal for their survival.
- CO6: Demonstrate the structure of tissues by making temporary slides.
- CO7: Demonstrate haemin crystals and effect of osmolarities on RBCs.
- CO8: Sketch and label the various systems and organs of *Pila*, *Balanoglossus* and *Calotes*.
- CO9: Prepare blood smear and identify the various cells.
- CO10: Draw exact figures of structures/organism using camera lucida.
- CO11: Measure the cell/organism dimensions.
- CO12: Prepare blood smear and identify the various cells.
- CO13: Process animal tissues and prepare permanent histological slides.
- CO14: Count total leucocytes from blood samples.
- CO15: Estimate the Hb.level in blood samples.
- CO16: Estimate blood glucose level, BT and CT.

Course ZY 348 Practical Paper II

After successfully completing this course, students will be able to:

- CO1: Identify the fossil types/ adaptations in animals.
- CO2: Explain the stages of human evolution.
- CO3: Demonstrate the effect of physical and chemical factors on enzyme activity.
- CO4: Explain the evidences of evolution
- CO5: Demonstrate physical and chemical properties of water and soil samples.
- CO6: Illustrate the application of Hardy –Weinberg law
- CO7: Detect given carbohydrates using biochemical tests.
- CO8: Measure the pH of given samples.
- CO9: Isolate protein from milk.
- CO10: Prepare acid and base solutions and titrate them.
- CO11: Collect and identify freshwater planktons.
- CO12: Determine LD50 and LC50.
- CO13: Estimate nucleic acids in given samples.
- CO14: Elucidate the difference between ape and man.
- CO15: Prepare temporary mounting of Giant chromosome.
- CO16: Prepare paper model of DNA.
- CO17: Record zoogeographical distribution of animals.

Course ZY 349 Practical Paper III

After successfully completing this course, students will be able to:

- CO1: Identify the life cycle stages of few parasites.
- CO2: Identify and explain the types of eggs, blastulae and gastrulae
- CO3: Identify the age of chick embryo.
- CO4: Identify the phases of cell division.

- CO5: List the household Pest and social insects.
- CO6: Explain the pathogenicity and morphology of few ectoparasites.
- CO7: Explain the diseases spread by vectors.
- CO8: Explain the interrelationship of insects and human with examples.
- CO9: Explain the effects of household insects on human health.
- CO10: Demonstrate rectal parasites in cockroach.
- CO11: Demonstrate Mitochondria/ mitotic and meiotic stages by stained preparations.
- CO12: Illustrate the social organization in insects.
- CO13: Prepare temporary slide of chick embryo to identify the stage and age.
- CO14: Prepare mounting of mouth parts of few common insects.
- CO15: Justify the effect of colchicine on cell division.

Department of Botany
Course Outcomes

Botany	
F Y B. Sc. BO111 and BO 121 Plant life and utilization. SEM. I and II	1. Understand the basic principles of Botany.
	2. To study morphology of plants.
	3. To get them economic importance of plants.
	5. To get the knowledge of functions of plants.
BO 112 Plant morphology and Anatomy	1. To get knowledge of range of plant diversity in terms of structure, function and environmental relationships
	2. To study local flora.
	3. To get knowledge of adaptations in plants
	4. Think logically and organize tasks into a structured form.
BO122 Principles of plant science	1. The evaluation of plant diversity.
	2. The role of plants in the functioning of the global ecosystem.
	3. Plant classification and the flora of Maharashtra
	4. Students learn to carry out practical work, in the field and in the laboratory, with minimal risk.
	5. Students learn Vegetation analysis techniques.
S. Y. B. Sc. BO 231: Taxonomy of Angiosperms and	1. Learn the types of classifications- artificial, Natural and phylogenetic.

Plant Ecology	
	2. Gain knowledge about Botanical Survey of India (BSI).
	3. Briefly studied on herbarium techniques.
	4. Learn the taxonomic evidences from molecular, numerical and chemicals.
	5. Brief studied the economic products with special reference to the Botanical name, family, morphology of useful part and the uses
BO232: Plant Physiology	1. Know about the requirement of mineral nutrition for plant growth
	2. Understand the process of Photosynthesis, Respiration and Nitrogen metabolism
BO 414: Plant Anatomy and Embryology	1. Understand the internal structure of plant body.
	2. Study the development of plant embryo.
	3. Understand the development of gametes and embryo formation.
	4. Learn the anatomy in relation to taxonomy.
BO 242 Plant Biotechnology	1. To learn methodology of plant tissue culture

	2. Learn the specific and non-specific methods of gene transfer
	3. Recombinant DNA technology
	4. Applications of Biotechnology in Plant, and Human welfare
T.Y.B. Sc. Course Semester III	
BO. 331 Cryptogamic Botany	1. Learn about the structure, pigmentation, food reserves and methods of reproduction of Algae.
	1. Learn about the structure, food reserves and methods of reproduction of Fungi.
	3. Know about the Economic importance of algae, Fungi and lichen.
BO. 332 Cell and Molecular Biology	1. Learn the structure, chemistry and functions of cellular organelles.
	2. Study the structure and properties of Macromolecules.
BO. 333 Genetics and Evolution	1. Learn about Mendelian principles.
	2. Know about gene mapping methods & Extra chromosomal inheritance.
	3. Familiarize about Evolution & Emergence of evolutionary thoughts.
	4. Gain knowledge on Plant breeding techniques
BO. 334 Spermatophyta and Palaeobotany	1. Know about the structure, life history and Economic importance of Gymnosperms.

	2. Learn the fossil plants and past flora.
	3. Studied the methods of fossilization and fossil plants.
BO. 335 Horticulture and Floriculture	1. Learn the importance of horticulture – career and occupational opportunities
	2. Learn the techniques of gardening - Types, Methods & Tools
	3. Learn about Floriculture - Cultivation of commercial flower crops
BO. 336 Computational Botany	1. Studied the application of Bioinformatics in Drug designing.
	2. Learn the phylogenetic analysis –molecular evolution
Semester IV	
BO.341 Plant Physiology and Biochemistry	1. Understand the process of Photosynthesis, Respiration and Nitrogen metabolism.
	2. Know about the Plant Growth hormones (Auxins, Gibberellins, Cytokinins, Ethylene)
	3. Understand the biosynthesis of phenols and nitrogenous compounds
	4. Know about the requirement of mineral nutrition for plant growth.
BO.342 Plant Ecology and Biodiversity	1. Learn the Approaches to the study of Ecology (Autecology, Synecology and Genecology)
	2. Understand the population & Community Ecology - concept of metapopulation
BO.343 Plant Pathology	1. Studied some plant diseases with special reference to the causative agents, symptoms, etiology and control measures.

BO.344 Medicinal and Economic Botany	1. Brief studied the economic products with special reference to the Botanical name, family, morphology of useful part and the uses
	2. Learn the taxonomic evidences from molecular, numerical and chemicals.
BO.345 Plant Biotechnology	1. Biotechnology and IPR, Biosafety, Biopiracy, Bioterrorism and Bioethics.
	2. Recombinant DNA technology
	3. Know about the morphogenesis and organogenesis in plants.
	4. Study about the role of tissue culture in crop improvement.
BO.346 Plant Breeding and Seed Technology	1. Learn about Mendelian principles
	2. Know about gene mapping methods & Extra chromosomal inheritance
	3. Gain knowledge on Plant breeding techniques

Dr. Vilas Patil
Dept. of Botany

Course Outcomes 2019 PATERN

Class - FYBA Semester 1 CBCS 2019

Course Code – 11021A

Course Name - मराठी साहित्य : कथा आणि भाषिक कौशल्यविकास [CC-1A]

- कथा या साहित्य प्रकारची ओळख होईल.
- कथा या साहित्यप्रकाराचे स्वरूप, घटक आणि प्रकार यांची ओळख होईल.
- भाषिक कौशल्यविकासाचे महत्त्व समजेल.
- इलेक्ट्रॉनिक माध्यमांचे ज्ञान अवगत होईल.
- समकालीन साहित्याचे विविध पैलू समजतील.

Class - FYBA SEM – II

CBCS-2019

Course Code – 11022 A

Course Name - मराठी साहित्य एकांकिका आणि भाषिक कौशल्यविकास [CC-1A]

- एकांकिका या साहित्यप्रकाराची ओळख होईल.
- एकांकिका या साहित्यप्रकाराचे स्वरूप, घटक आणि प्रकार यांची ओळख होईल.
- भाषिक कौशल्यविकासाचे महत्त्व समजेल.
- भाषांतर करण्याचे ज्ञान अवगत होईल.
- संवाद लेखनाला चालना मिळेल.
- कल्पना शक्ती प्रबळ होईल.
- दूरदर्शन व रंगभूमीवरील एकांकिका पाहण्याची आवड निर्माण होईल.
- संवाद लेखन, कल्पनाविस्तार, घोषवाक्य लेखन व भाषांतर कौशल्याचा अभ्यास होईल.

Class – SYBA

Sem – I

2019 PATTERN

Course Code – 23023

Course Name – भाषिक कौशल्यविकास आणि आधुनिक मराठी साहित्यप्रकार : कादंबरी [CC - 1 C]

- कादंबरी या साहित्यप्रकारचे स्वरूप, घटक, प्रकार समजून घेता येईल.
- कादंबरी या साहित्य प्रकारांच्या विविध घटकांचे ज्ञान होईल.
- साहित्यकृतीचे आकलन, आस्वाद आणि मूल्यमापन करण्याची दृष्टी निर्माण होईल.
- कादंबरीतील विविध घटकांचे ते विश्लेषण करतील.
- साहित्यकृतीला मुक्त प्रतिसाद देण्याची क्षमता विकसित होईल.
- साहित्याचा सूक्ष्म पातळीवर अभ्यास करण्याची क्षमता विकसित होईल.

Class – SYBA Sem- II

2019 PATTERN

Course Code – 24023

Course Name – भाषिक कौशल्यविकास आणि आधुनिक मराठी साहित्यप्रकार : ललितगद्य [CC - 1 D]

- ललितगद्य या साहित्यप्रकारचे स्वरूप लक्षात येईल.
- ललितगद्य या साहित्यप्रकारची वाटचाल समजेल.
- ललितगद्याचे आकलन, आस्वाद आणि विश्लेषण करता येईल.
- आधुनिक तंत्रज्ञानाचा उपयोग कसा करायचा हे समजेल.
- भाषिक कौशल्यविकासाचे महत्त्व समजेल.

Class – SYBA Sem- I 2019 Pattern Course Code – 23021

Course Name – आधुनिक मराठी साहित्य : प्रकाशवाटा [DSE 1 A]

- आत्मचरित्र या साहित्यप्रकारचे स्वरूप, संकल्पना समजून घेता येईल.
- आत्मचरित्र या साहित्यप्रकाराच्या प्रेरणा आणि वाटचाल यांची ओळख होईल.
- आत्मचरित्र या साहित्यप्रकारचे वेगळेपण समजावून घेता येईल.
- आत्मचरित्र या साहित्यप्रकारचे आकलन, आस्वाद आणि विश्लेषण करता येईल.

Class – SYBA Sem- II 2019 Pattern Course Code – 24021

Course Name – मध्ययुगीन मराठी साहित्य : निवडक मध्ययुगीन गद्य, पद्य [DSE 1 B]

- मध्ययुगीन गद्य, पद्य साहित्य प्रकाराची ओळख होईल.
- मध्ययुगीन गद्य, पद्याचे आकलन, आस्वाद आणि विश्लेषण करता येईल.
- मध्ययुगीन गद्य, पद्य साहित्य निर्मितीच्या प्रेरणा समजून घेता येतील.
- मध्ययुगीन कालखंडाची संस्कृतिक, सामाजिक, राजकीय जडणघडण समजून घेता येईल.

Class – SYBA Sem- I

2019 Pattern

Course Code – 23022

Course Name – साहित्यविचार [DSE 2 A]

- भारतीय आणि पाश्चिमात्य साहित्यविचाराच्या आधारे साहित्याची संकल्पना स्वरूप आणि प्रयोजनविचार समजून घेता येईल.
- साहित्याची निर्मितीप्रक्रिया समजावून घेता येईल.
- साहित्याची भाषा आणि शैली विषयक विचार समजावून घेता येतील.
- भारतीय व पाश्चिमात्य साहित्य विचाराची विद्यार्थ्यांना ओळख होईल.
- साहित्याच्या निर्मिती प्रक्रियेविषयी चर्चा करू शकतील.
- साहित्याची भाषा समजावून घेता येईल.
- भामह, दण्डी, वामन, रुद्रट, भरत, अभिनवगुप्ता या संस्कृत मीमांसकांचा परिचय होईल.
- साहित्य आणि समाज यातील परस्परसंबंध समजतील.
- वाङ्मयीन मूल्ये समजतील.
- पाश्चिमात्य विचारवंत जॉन्सन, अर्नोल्ड, इ. च्या विचारांचे टिकात्मक परीक्षण करू शकतील.
- साहित्य प्रकाराची संकल्पना समजून घेता येईल.

Class – SYBA Sem- II

2019 Pattern

Course Code – 24022

Course Name – साहित्य समीक्षा [DSE 2 B]

- साहित्य समीक्षेची संकल्पना, स्वरूप यांचा परिचय होईल.
- साहित्य आणि समीक्षा यांचे परस्पर संबंध अभ्यासून त्याचे विवेचन करता येईल.
- साहित्यप्रकारानुसार समीक्षेचे स्वरूप समजावून घेता येईल.
- ग्रंथ परिचय, परीक्षण व समीक्षण यातील फरक समजावून घेता येईल.
- साहित्यव्यवहारातील समीक्षेचे स्थान व कार्य समजेल.
- समीक्षकाचे गुण व त्याने पाळावयाची पथ्ये लक्षात येतील.
- भाषिक, साहित्यिक व सांस्कृतिक संकेत समजतील.

Class – SYBA Sem- I 2019 Pattern Course Code – 23025

Course Name – प्रकाशनव्यवहार आणि संपादन (SEC 2 A)

(DSE विषयाशी निगडीत अनिवार्य)

- प्रकाशनव्यवहार आणि संपादन यासाठी आवश्यक कौशल्ये आत्मसात होतील.
- ग्रंथनिर्मिती प्रक्रिया समजून घेता येईल.
- प्रकाशनव्यवहार आणि संपादन यासाठी आवश्यक प्रशिक्षण घेता येईल.
- लेखनविषयक नियम समजून घेता येतील.

Class – SYBA Sem- II 2019 Pattern Course Code – 24025

Course Name – उपयोजित लेखनकौशल्य (SEC 2 B)

(DSE विषयाशी निगडीत अनिवार्य)

- जाहिरात, मुलाखतलेखन आणि संपादन यासाठी आवश्यक कौशल्य आत्मसात करता येतील.
- जाहिरात लेखनाचे स्वरूप समजावून घेता येईल.
- जाहिरात, मुलाखतलेखन आणि संपादन यासाठी आवश्यक प्रशिक्षण घेता येईल.
- मुलाखत लेखनाचे तंत्र समजावून घेता येईल.

Class – S.Y.B.A. Sem- I 2019 Pattern

Course Code – 23011

Course Name – मराठी भाषिक संज्ञापनकौशल्ये (MIL2)

- प्रगत भाषिक कौशल्यांची क्षमता विकसित होईल.
- प्रसारमाध्यमातील संज्ञापनातील स्वरूप लक्षात येईल.
- प्रसारमाध्यमांसाठी आवश्यक असलेली लेखनक्षमता विकसित होईल.
- लोकशाहीतील जीवनव्यवहार लक्षात येईल.
- व्यक्तिमत्व विकास होईल.

Class – S.Y.B.A. Sem- II 2019 Pattern

Course Code – 24011

Course Name – नवमाध्यमे आणि समाजमाध्यमांसाठी मराठी (MIL2)

- विविध समाजमाध्यमांचे स्वरूप व महत्त्व लक्षात येईल.
- भाषा, जीवनव्यवहार आणि समाजमाध्यमे यांचा परस्पर संबंध लक्षात येईल.
- समाजमाध्यमांचा परिणामकारकपणे वापर करता येईल.
- समाजमाध्यमांसाठीची लेखनक्षमता विकसित होईल.

Course Name – भाषा, साहित्य आणि कौशल्यविकास (117A)

- विविध क्षेत्रातील भाषा व्यवहाराचे स्वरूप व गरज समजावून घेता येईल.
- निबंध या लेखन प्रकाराची दृष्टी निर्माण झाल्याने वैचारिक, ललित व वाणिज्य विषयक ललितलेखन करण्याची क्षमता निर्माण होईल.
- उत्कर्षवाटा या पाठ्यपुस्तकाच्या अभ्यासामुळे विद्यार्थ्यांना व्यावसायिक, सामाजिक व राजकीय प्रश्नांची जाणीव होईल.
- उत्कर्षवाटा या पाठ्यपुस्तकाच्या अभ्यासामुळे विद्यार्थ्यांमध्ये नैतिक, व्यावसायिक व वैचारिक मूल्यांची जोपासना होईल.
- विद्यार्थ्यांमध्ये चरित्र व आत्मचरित्र या साहित्यप्रकारांचा परिचय होईल.

Course Name – भाषा आणि कौशल्यविकास (117B)

- विविध क्षेत्रातील भाषा व्यवहाराचे स्वरूप व गरज समजावून घेता येईल.
- वाणिज्य विषयाच्या विद्यार्थ्यांना मराठी भाषेच्या व्यावहारिक क्षेत्राची व विविध क्षेत्रातील भाषा उपयोजनेची माहिती व स्वरूप याचे ज्ञान होईल.
- मराठी भाषेचे उपयोजन करण्याची सवय लागेल उदा.पत्रलेखन ,कार्यालयीन मराठी, अहवाल लेखन,अर्ज लेखन इ.
- प्रसार माध्यमांतील आकाशवाणी, दूरदर्शन व वर्तमानपत्र यांचे स्वरूप त्यांची कार्यपद्धती आणि माध्यमाबद्दल जिज्ञासा निर्माण होईल.
- भविष्यात या प्रसारमाध्यमांमध्ये काम करण्याची आवड निर्माण होईल.
- वाणिज्य व अर्थकारण मराठीतून प्रभावीपणे मांडणे शक्य होईल .
- मराठीतून वाणिज्य विषयक लेखन करण्याची क्षमता निर्माण होईल .
- इलेक्ट्रॉनिक माध्यमांमध्ये मराठी भाषेचा वापराची आवड निर्माण होईल.
- सारांशलेखन व भाषांतर या लेखनकौशल्याचा परिचय होईल.

Class – S.Y.B.Sc. Sem- I

2019 Pattern

Course Code – 23331

Course Name – उपयोजित मराठी (AECC- 2 A)

- दैनंदिन जीवनात आवश्यक व्यवहारीक भाषा, शास्त्रीय लेखनाची भाषा, प्रसार माध्यम आणि समाज माध्यम लेखनाच्या भाषेची ओळख होईल.
- अर्ज लेखन, संगणकीय अर्ज लेखन आणि स्व परिचय इत्यादी लेखन कौशल्य विकसित होतील
- प्रसारमाध्यमांसाठी आवश्यक लेखन कौशल्याचा विकास होईल
- लेख लेखन, भाषण लेखन, माहितीपटासाठी आवश्यक लेखन कौशल्याचा विकास होईल

Class – S.Y.B.Sc. Sem- II

2019 Pattern

Course Code – 24331

Course Name – मराठी साहित्य (AECC- 2 B)

- विज्ञान विषयक साहित्याचा परिचय होईल.
- विज्ञान विषयक दृष्टिकोन निर्माण होईल.
- मराठी भाषा, मराठी साहित्य आणि विज्ञान यांच्या परस्पर संबंधाची जाणीव होईल.
- विज्ञान साहित्य विषयक आकलन क्षमता वृद्धीस लागेल.

LONAVLA EDUCATION TRUST
DBNP ARTS, SSGG COMMERCE AND SSAM SCIENCE COLLEGE
LONAVLA,
Department of -Geography

Course Outcomes

F. Y. B. A. Geography

Course Gg110 A: Physical Geography (General -1)

Course Gg110 B: Human Geography (General -1)

The student who successfully completes this course can able to:

CO1: Explain principal terms, definitions, Concept and theories of Physical Geography

CO2: Discuss development of micro to mega scale landforms.

CO3: Identify different Materials of the earth crust, rock types, and types of weathering,

mass movements and types of slope.

CO4: Describe importance of latitude, longitude and the reasons why different countries

have different time zone and date.

CO5: Apply knowledge of basic landforms from tectonic, volcanic, fluvial and coastal

environments.

CO6: Evaluate exogenous and endogenous processes in the landscape, their importance

in landform development, and distinguish the mechanisms that control these processes.

CO7: Describe nature of man-environment relationship and human capability.

CO8: Explain conditions of living of human beings from primitive life to the modern

era.

CO9: Explain human evolution and different races existed since the beginning of living

life.

CO10: Describe different tribes and their culture in different geographical areas.

S.Y.B.A. Geography (G2) Syllabus for Semester III

Name of Subject: Environment Geography- I, Subject Code: Gg.210 (A)

Co 1. To create the awareness about dynamic environment among the student.

Co 2. To acquaint the students with fundamental concepts of environment geography for development in different areas.

Co 3. The students should be able to integrate various factors of Environment and dynamic aspect of Environmental geography.

Co 4. To make aware the students about the problems of environment , their utilization and conservation in the view of sustainable development

S.Y.B.A. Geography (G2) Syllabus for Semester IV

Name of Subject: Environment Geography- II, Subject Code: Gg.210 (B)

Objectives:

Co 1. To create awareness about dynamic environment among the students.

Co 2. To acquaint students with the fundamental concepts of Environment Geography.

Co 3. To acquaint students about the past, presents and future utility and potentials of natural resources.

Co 4. To make aware students about the problems of environment, its utilization and conservation in the view of sustainable development.

Course F.Y.B.Com: Elements of Commercial Geography I

Co I. To understand the scope and content of commercial geography in relation to the spatial distribution of resources.

Co II. To acquaint the students with the dynamic nature of commercial geography

Co III. To acquaint the students with the dynamic nature of Trade and Transport.

Co IV. To make students aware of the relationships between geographical factors and economic activities

Course F.Y.B.Com: Elements of Commercial Geography I

Co1. To make students of the Commerce faculty aware of the correlations between Economic activities and Geographical factors.

Co 2. To acquaint the students with the Industrial sector and the pollution associated with it.

Co 3. To make the students aware of the changing role of transport and communication in Trade and Commerce.

Co 4. To make the students aware of the role of tourism in development.

Co 5. To acquaint students with basic cartographic techniques

T.Y.B.A. Geography

Course Gg 310: Human Geography (G-3)

After successfully completing this course, students will be able to:

CO1: Describe nature of man-environment

CO2: Explain conditions of living of human beings from primitive life to the modern

era.

CO3: Explain human evolution and different races existed since the beginning of living

life.

CO4: Describe different tribes and their culture in different geographical areas.

CO5: Explain causes and effect of migration of mankind.

CO6: Analyse relationship between population and available resources.

CO7: Identify and explain spatial distribution pattern of population and environment

CO8: Identify contemporary issues which the global community is facing.

Department of Economics

Course Outcomes

1. FYBCOM- Business Economics

This course has two semesters, in the first semester there are four topics-they are related to Microeconomics, Macro concepts, cost revenue demand in detail. The 2nd semester also has 4 topics, they are related to Market structure, their equilibrium features, factor pricing-determination of price paid to factors.

Outcome of the course

1. To make the students aware and clear about the concepts of Economics.
2. To know about the practical use of the different tools used in Economics.
3. To impart the students, the knowledge of the subject in such a way that they will be able to analyze and criticize the theories.

2. TYBCOM-Indian and Global Economic development

This Course is more related with the Indian Economy as an emerging economy so there is comparison between India and other developed economies. Besides, it includes topics on international organizations.

Outcome of the course

1. To make Students think and analyze the role of Indian Economy in relation to developed Economies.
2. Comparison of Indian Economy in relation to agriculture, Industry and service sectors with developed economies
3. It throws light on the different international institutions and their relation with India. And India's place in these institutions.
4. It makes the student aware regarding BRICS, SAARC, IMF, ADB organizations as they are in present state.

3. SYBA-G2-Financial Systems

This course is very useful to the students as it covers the financial system. The students come to know about the commercial, cooperative and reserve bank.

Outcome of the course

1. The students learn about its functions, its role and problems of these banks.
2. The students learn how the financial market is divided into 2.
3. The study of the capital market is also important as many students opt for joining the share market. It gives them basic knowledge of this market.
4. It helps students know what the non-banking financial intermediaries are. Whether to invest in them is profitable. They even get an idea of foreign exchange market

4. SYBA S1-Micro Economics

This course helps Students know about Economics clearly. The course includes topics on demand, supply, cost, revenue, market structure, factor price etc.

Outcome of the course

1. The different theories of demand and supply helps students analyze the problem of rise or fall in price.
2. Elasticity of demand helps students know why demand for a commodity or factor of production shows increase or decrease in percentage.
3. The students learn as to how price of factor as well as commodity is determined.
4. The students learn about the different types of commodity markets existing.
5. The course gives the students clear understanding of the concepts and difference between micro and macroeconomics.

5.SYBA-SEC-Basic concepts of research methodologies

This is a very good course introduced in the present credit system for students pursuing research in future.

Outcome of the course

1. This course helps students know about different ways of doing research
2. The different statistical methods used in research are known to the students.
3. It helps the students know how to demonstrate a particular topic with the help of graphs of different types.
4. It even helps the students to know how or what are the different sources of collecting data points.
5. The students even get prepared as to how a problem is to be analyzed and recommend solutions for the problems and measures to be taken.

6. TYBA S4-Public Finance

This course helps the students know about the government's expenditure and revenue sources. It also teaches them about different types of taxes, debts and methods of their payment.

Outcome of the course

1. The course helps students learn and analyze as to what is exactly public finance study about
2. It helps students know as to how and from which source the revenue is collected and why it is spent.

3. It helps students explain different types of expenditure the government makes and why there is a continuous rise in public expenditure.
4. The Debt which is ever increasing to know what is external and internal debt, its effect on the economy and problems of repayment of the debt

Department of Psychology

Course outcomes

F.Y.B.A (Semester I)

Foundations of Psychology

1. Understand the basic psychological processes and their applications in day to day life.
2. Develop the ability to evaluate cognitive processes, learning and memory of an individual.
3. Understand the importance of motivation and emotion of the individual.
4. Understand the personality and intelligence of the individuals by developing their psychological processes and abstract potentials.

F.Y.B.A (Semester II)

Introduction to Social Psychology

1. Understand the basics of social psychology.
2. Understand the nature of self, concept of attitude and prejudice of the individual.
3. Assess the interactional processes, love and aggression in our day today life. .
4. Understand group dynamics and individuals in the social world.

S.Y.B.A (Semester III)

Health psychology

- 1) Understand the role of psychology in health.
- 2) understand various Bio- psycho social factors related to health and disease.
- 3) Understand the mind-body relationship.
- 4) Realize the importance of quality of life and promoting good health.

S.Y.B.A (Semester IV)
Positive Psychology

- 1) Understand how positive psychology works as the science of happiness.
- 2) Understand the difference between pleasure, happiness and satisfaction.
- 3) Realize the importance of positive emotions in well-being.
- 4) Traced the contours of positive life.

TYBA (G3) Industrial and organizational psychology

- 1) Comprehensive the emergency of industrial and organizational psychology.
- 2) Get acquainted with work done in industrial and organizational psychology.
- 3) Understand the significance of training performance of appraised and leadership models.
- 4) Understand the importance of job satisfaction.
- 5) Realize the importance of engineering psychology.

Department of English

PROGRAMME OUTCOMES

The study of English Literature helps students explore how writers use the creative resources of language-in fiction, poetry, nonfiction prose, and drama-to explore the entire range of human experience. From the study of literature students are expected to be imaginative, rhetorically dexterous, and technically proficient and most importantly have a deeper insight into life

LEARNING OUTCOMES

Learning outcomes specify what students after completing a programme is expected to know and do. What attributes will a student develop in himself during the period he is made to acquaint himself to the papers taught .

FYBA OPTIONAL ENGLISH

This course paper is an amalgamation of prose, poetry, short stories and phonetics. The students will gain insight into the poetic devices employed by the poets. They will have an ability to critically read the texts and understand their broader implications. The students will become acquainted with certain issues addressed in the syllabus such as culture gender race etc.The students will also learn about the articulation of sounds.

SYBA S1 (Drama)

1. The students will learn to comprehend drama. They will gain a brief understanding of the dramatists and their works in the light of social, cultural and historical conditions of their times. The students will also learn to what extent are the texts taught relevant even in modern times.
2. It will hone their skills to evaluate and interpret dramatic lite

SYBA Compulsory English

This course paper is an amalgamation of prose, poetry, short stories and language. The students will get a bird's eye view of all the three genres of literature. The course also gives some space to language. They will learn the different poetic forms and the socio-political issues of the times in which the poems were written.

The study of prose will enable the students to comprehend, interrogate and redefine the multi-faceted aspects of a culture. The study of language will enable them to write clearly, effectively, and creatively. They will also learn to write accurately and appropriately in accordance to the content, context, and nature of the subject. In this era of globalization, we cannot undermine the importance of communication skills. The study of language and grammar will help the students to learn the art of transmitting information and ideas both in verbal communication and written communication.

S. Y. B. Sc . OPTIONAL ENGLISH

The course largely give an emphasis on communication skills, how to work with other people in a collaborative manner and how to participate in group discussion and leave an everlasting mark.

TYBA S3 (NOVEL)

The students will be introduced to the concept of existentialism, stream of consciousness, popular form of novel widely written and read in different periods, and the reflection of human emotions in the novel. The students will develop an ability to think critically on various issues and relate the same with real life situation.

Department of Political Science

FYBA Political Science (w.e.f 2013-2014)

Objectives:

This paper focuses in detail on the political processes and the actual functioning of the political system. It simultaneously studies in detail the political structure both Constitutional and Administrative. It emphasizes on local influences that derive from social stratification of castes and jatis, from language, religion, ethic and economic determinants and critically assesses its impact on the political processes. The major contradictions of the Indian Political Process are to be critically analyzed along with an assessment of its relative success and failure in a comparative perspective with other developing countries and in particular those belonging to the South Asian region.

SYBA General Political Science Political Theory and Concepts (w.e.f 2014-2015)

Course Outcomes:

This is an introductory paper to the concepts, ideas and theories in political theory. It seeks to explain the evolution and usage of these concepts, ideas and theories with reference to individual thinkers both historically and analytically. The different ideological standpoints with regard to various concepts and theories are to be critically explained with the purpose of highlighting the differences in their perspectives and in order to understand their continuity and change. Furthermore there is a need to emphasize the continuing relevance of these concepts today and explain how an idea and theory of yesteryears gains prominence in contemporary political theory.

SYBA S-I Political Science Western Political Thought (w.e.f 2014-2015)

Course Outcomes:

This paper studies the classical tradition in political theory from Plato to Marx with the view to understand how the great Masters explained and analyzed political events and problems of their time and prescribed solutions. The texts are to be interpreted both in the historical and philosophical perspectives to understand the universality of the enterprise of political theorizing. The limitations of the classical tradition, namely its neglect of women's concerns and issues and the non-European world are critically examined. The legacy of the thinkers is explained with the view to establish the continuity and change within the Western political tradition.

SYBA S-II Political Science Political Sociology (w.e.f 2014-2015)

Course Objectives:

This Course will introduce the overall scope of the sub-discipline of political sociology. To study the relationship between society and polity. The emphasis is on the study the various approaches to study the State and to understand the contemporary socio-political challenges.

TYBA General Political Science Political Ideologies (w.e.f 2015-2016)**Course Rationale:**

This paper studies the role of different political ideologies and their impact in politics. Each ideology is critically studied in its historical context. In course of its evolution and development, the different streams and subtle nuances within each ideology, the changes and continuities in its doctrine and its relevance to contemporary times are highlighted. The close link between an idea and its actual realization in public policy needs to be explained as well. The philosophical basis of the ideologies is emphasized with special emphasis on key thinkers and their theoretical formulations. The legacy of all the major ideologies is to be critically assessed.

TYBA S-III Political Science Public Administration (w.e.f 2015-2016)**Course Rationale**

This paper is an introductory course in Public Administration. The essence of Public Administration lies in its effectiveness in translating the governing philosophy into programmes, policies and activities and making it a part of community living. The paper covers personnel public administration in its historical context thereby proceeding to highlight several of its categories, which have developed administrative salience and capabilities to deal with the process of change. The recent developments and particularly the emergence of New Public Administrations are incorporated within the larger paradigm of democratic legitimacy. The importance of legislative and judicial control over administration is also highlighted.

TYBA S-IV Political Science International Politics (w.e.f 2015-2016)**Course Rationale**

This paper deals with concepts and dimensions of international relations and makes an analysis of different theories highlighting the major debates and differences within the different theoretical paradigms. The dominant theories of power and the question of equity and justice, the different aspects of balance of power leading to the present situation of a unipolar world are included. It highlights various aspects of conflict and conflict resolution, collective security and in the specificity of the long period of the post Second World War phase.
